Multiplication

REFERENCE

MODULE - 6
UNIT - 1

## Introduction to multiplication

A teacher asked her students to pair up and form teams to play a game.
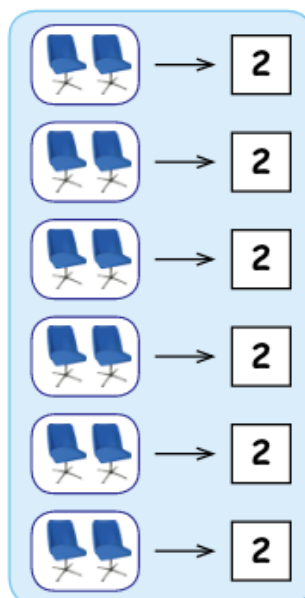

4 pairs of children formed 4 teams.

How many were there in a team? 2 students

So, in four teams there were:

2 + 2 + 2 + 2 = 8 students. There were four 2s.

or

4 times 2 is 8.

There are 6 rows of 2 chairs each. Find how many chairs are there?

2 + 2 + 2 + 2 + 2 + 2 = ☐

Or 6 times 2 is ☐

Also, 6 times 2 is the same as starting from 0 and counting by 2s 6 times.

0 1 2 3 4 5 6 7 8 9 10 11 12

2 + 2 + 2 + 2 + 2 + 2 = 6 times 2

Observe that each group has an equal number.
